To: Cally Younger <cyounger@blm.gov>

Cally, Here are maps with some of the individual data layers you were looking for. The first is Wilderness Study Areas. The second is Lands with Wilderness Character. There is still some project related LWC inventory work being done in the southwest portion of the monument so it will change. The last two maps show oil and gas and coal leases at the time the monument was established. We are will get mineral potential information tomorrow. The last map shows polygons depicting the landscape features

**Landscape Features**

The Grand Staircase
Upper Paria Canyon system
White Cliffs
Vermilion Cliffs
East Kaibab Monocline
(Cockscomb)
Burning Hills
Kaiparowits Plateau
Circle Cliffs
Waterpocket Fold
Escalante Natural Bridge
Grosvenor Arch
Upper Escalante Canyons
No Mans Mesa - relic grasslands

When we get the mineral info we can produce a map with all four layers you requested. ed
